

What is claimed is: CLAIMS:

1(currently amended). A support for a detachable shower head,
comprising: having
~~4.1~~ a mounting fixture ~~(2)~~ for installing the support for the shower head **so as to**
place the support for the shower head ~~such that it may at least be installed~~ at a fixed
location,
~~4.2~~ a wall-mounting arm ~~(5)~~ jutting out of the mounting fixture ~~(2)~~, and
~~4.3~~ a holder for the shower head ~~(8)~~ attached to the wall-mounting arm ~~(5)~~, in ~~a the~~
vicinity of ~~an that~~ end thereof that is opposite **from** the mounting fixture ~~(2)~~.

2(currently amended). A shower support according to claim 1, wherein the
wall-mounting arm ~~(5)~~ jutting out of the mounting fixture ~~(2)~~ is ~~may be~~ pivoted on the
mounting fixture ~~(2)~~, and the holder for the shower head ~~(8)~~ that is attached to ~~the that~~
end of the wall-mounting arm ~~(5)~~ that is opposite **from** the mounting fixture ~~(2)~~ is pivoted
on the wall-mounting arm ~~(5)~~.

3(currently amended). A shower support according to claim 2, wherein ~~a the~~
pivot axis of the holder ~~(13)~~ for the shower head is approximately orthogonal to ~~a the~~
longitudinal axis of the wall-mounting arm ~~(5)~~.

4(currently amended). A shower support according to claim 2 ~~or claim 3~~,
wherein ~~an the~~ axis, about which the wall-mounting arm ~~(5)~~ pivots on the mounting
fixture ~~(2)~~ is parallel to ~~a the~~ surface of a wall.

5(currently amended). A shower support according to **claim 1** ~~any of the~~
~~forgoing claims, wherein the axis, about which~~ the wall-mounting arm ~~(5)~~ pivots on the
mounting fixture ~~(2)~~, ~~lies~~ **about an axis** in a horizontal plane.

6(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the wall-mounting arm pivots about a pivot axis on the mounting fixture and the holder for the shower head pivots about a pivot axis on the wall-mounting arm, and wherein said two pivot axes are parallel to one another.

7(currently amended). A shower support according to claim 6 ~~any of the foregoing claims~~, wherein a ~~the~~ maximum pivot angle of the holder for the shower head ~~(8)~~, relative to the wall-mounting arm ~~(5)~~, at least equals a ~~the~~ maximum pivot angle of the wall-mounting arm ~~(5)~~, relative to the mounting fixture ~~(2)~~.

8(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the wall-mounting arm ~~(5)~~ is configured to ~~in the form of a~~ fork, at least in the vicinity of its far end ~~(7)~~ from the mounting fixture.

9(currently amended). A shower support according to claim 8, wherein the holder for the shower head ~~(8)~~ is arranged between ~~the~~ tines ~~(11)~~ of the fork.

10(currently amended). A shower support according to claim 8 ~~or claim 9~~, wherein the wall-mounting arm ~~(5)~~ forks approximately midway along its length.

11(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein a ~~the~~ pivot axis of the holder for the shower head ~~(8)~~ intersects a ~~the~~ housing of the shower head ~~(8)~~ near a ~~the~~ centroid thereof.

12(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the holder for the shower head ~~(8)~~ is configured to engage a location on the housing of the shower head ~~(8)~~ provided for ~~the purpose of~~ holding it that is not recognizable as such and acts by means of an interference fit in a ~~the~~ withdrawal/insertion direction.

13(currently amended). A shower support according to claim 12, wherein the holder is configured to engage a location on the housing of the shower head ~~(8)~~

provided for ~~the purpose of~~ holding it that is not recognizable as such, based on its shape at that location.

14(currently amended). A shower support according to claim 12 ~~or claim 13~~, wherein the holder is configured to engage a ~~the~~ outer perimeter of the shower head ~~(8)~~.

15(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the shower head ~~(8)~~ remains functional following withdrawal from the holder.

16(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the holder, together with the shower head ~~(8)~~ inserted therein, may be pivoted about an axis orthogonal to a ~~the~~ longitudinal axis of the arm ~~(5)~~.

17(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the arm ~~(5)~~ may be pivoted about a horizontal axis situated in a ~~the~~ vicinity of that end thereof that is coordinated to the mounting fixture ~~(2)~~.

18(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the holder for the shower head ~~(8)~~ has at least two jaws ~~(14)~~ for engaging the housing of the shower head ~~(8)~~.

19(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the holder engages the shower head ~~(8)~~ at two locations on its surface that are situated approximately opposite one another.

20(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the holder for the shower head ~~(8)~~ engages the housing of the shower head ~~(8)~~ at two diametrically opposed locations thereon.

21(currently amended). A shower support according to claim 19, wherein the jaws (14) are tensioned toward one another while the shower head (8) is inserted.

22(currently amended). A shower support according to claim 19 ~~or claim 20~~, wherein the two jaws (14) on the holder for the shower head (8) are joined together by a tensioning component (15).

23(currently amended). A shower support according to claim 22, wherein the tensioning component (15) is configured such that contact between it and the housing of the shower head (8) takes place over an extended area.

24(currently amended). A shower support according to claim 22, wherein the tensioning component (15) is configured such that a gap between it and the housing of the shower head (8) occurs at at least one location, ~~in particular, is configured such that it does not contact the housing of the shower head (8) at any location thereon.~~

25(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the arm (5) is configured in a ~~the~~ form of a ~~, if necessary, curved, rod forming a continuous unit all the way out to its far end, on whose far end the holder (13) for the shower head (8) is arranged.~~

26(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the shower head (8) is configured in a ~~the~~ form of a hand-held shower head having a grip attached to its housing.

27(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein the ~~shower head's~~ housing of the shower head is disk-shaped.

28(currently amended). A shower support according to claim 1 ~~any of the foregoing claims~~, wherein a hose (10) leading to the shower head (8) is connected to the mounting fixture (2).

29(currently amended). A shower support according to **claim 22** ~~any of claims 22-28~~, wherein the tensioning component ~~(15)~~ may be used for gripping the arm ~~(5)~~ while the shower head ~~(8)~~ is detached.

30(currently amended). A shower support according to **claim 1** ~~any of the foregoing claims~~, wherein the axis about which the holder may be rotated intersects the shower head near ~~a the latter's~~ centroid **of the shower head.**

31(new). A shower support according to claim 24, wherein the tensioning component is configured such that it does not contact the housing of the shower head at any location thereon.

32(new). A shower support according to claim 25, wherein the rod is curved.
